

LU-Lite Laptop Solution

Fast and Reliable File Transfer and Live Video via your Laptop

LiveU's bonded laptop solution offers fast, reliable and high-quality mobile bonded transmission via the laptop, using up to six simultaneous Wi-Fi, LAN, cellular and satellite connections, including all BGAN services. With a user-friendly interface, the LU-Lite software is easy to use and highly flexible, supporting any camera input provided by your hardware.

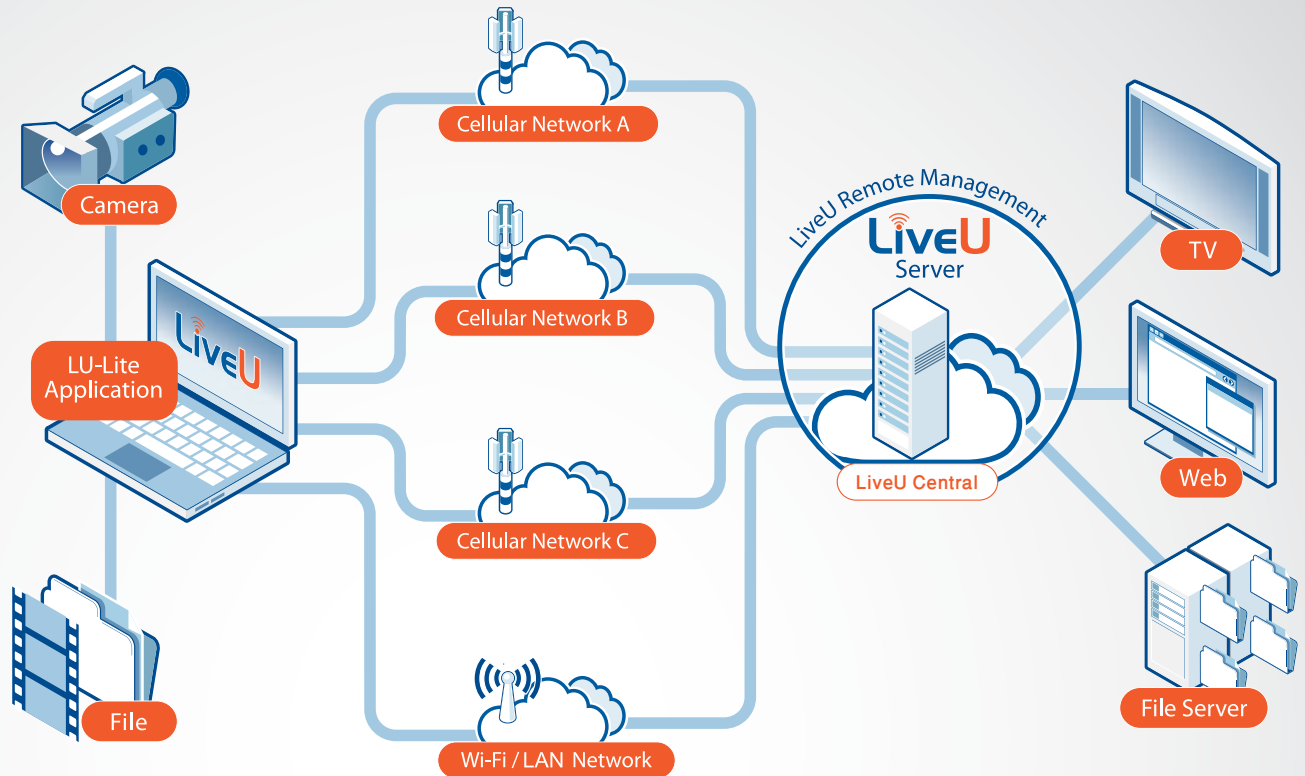

Based on LiveU's fourth-generation bonded uplink technology, the LU-Lite software serves a wide variety of applications and workflows in the field, including file transfer and Store & Forward as well as editing and live interviews using the laptop webcam.

LU-Lite connects to your existing LiveU receiving server and incorporates seamlessly into the LiveU Central management platform, enabling control rooms to manage multiple video feeds from all of your LiveU units operating in diverse locations for a smoother workflow configuration.

Live Video Wherever, Whenever
