

GLOBAL IP SATELLITE SERVICE

More capacity, flexibility
& reliability

Delivers the best
HEVC Cellular Bonding
and **Satellite Connectivity**
in one simple plan

LiveU's Global IP Satellite service makes it easier and more cost-effective for customers to cover news and events live wherever they are in the world by combining LiveU's HEVC bonding technology with satellite connectivity service. This gives customers "the best of both worlds" – a robust hybrid live solution that fits their production needs, streamlines the workflow, and simplifies the billing structure. With LiveU, broadcasters don't need to choose between cellular bonding and satellite to ensure a reliable, high-quality feed every time – it simply happens automatically based on the lowest cost available bandwidth.

WHAT YOU GET:

- ▶ Automatic least-cost routing □ use satellite only when needed
- ▶ Pool your data across all vehicles and satellite terminals
- ▶ Same data pool as your existing LU600 data plan*
- ▶ Non-contended, dedicated 2Mbps uplink/2Mbps return
- ▶ No streaming reservation required
- ▶ All-in-one data plan in one simple bill

* Satellite not to exceed more than 12GB per month
