

LiveU InterPoint

LiveU InterPoint is a cost-effective point to multi-point distribution solution for inter-organizational video sharing

LiveU's Distribution Solutions provide solutions for sharing high quality live video between multiple broadcast facilities over the public Internet. LiveU InterPoint is ideal for sharing live video with sister organizations and distribution to select points. InterPoint is based on LiveU's Patented Adaptive Algorithm which is optimized per network condition and does not require a guaranteed link.

- ❑ **Link redundancy** by bonding of two LAN interfaces
- ❑ **Adaptive video streaming** using LRT™ (LiveU Reliable Transport)
- ❑ **Supports inter-organization video sharing**
- ❑ **Based on existing HW** using LU2000 deployed server
- ❑ **Easy setup & operation** - based on LiveU Central; fast setup and familiar workflow
- ❑ **Low Delay** - .5 second end-to-end delay
- ❑ **End-to-End solution** - includes encoder, decoder and transport stream
