

LiveU SinglePoint

A cost-effective point-to-point occasional distribution solution for multi-bureau broadcasters

LiveU's Distribution Solutions provide solutions for sharing high quality live video between multiple broadcast facilities over the public Internet. LiveU SinglePoint allows broadcasters with one or more bureaus to replace their Fiber/Satellite connections with LiveU infrastructure, using two wired, non-guaranteed, bonded LAN interfaces to send video from their bureaus to headquarters.

- **Supports bonding** of 2 Ethernet links
- **Adaptive video streaming** using LRT™ (LiveU Reliable Transport)
- **Link redundancy** by bonding of two LAN interfaces
- **Based on existing HW** using LU2000 deployed server
- **Easy setup & operation** - based on LiveU Central; fast setup and familiar workflow
- **Low Delay** - 1 second end-to-end delay
- **End-to-End solution** - includes encoder, decoder and transport stream
